

Faith Fedge Garden June 2021

On June 26, 2021, a group of about 25 congregants gathered to plant the Faith Fedge Garden along the retaining wall on the Erb St Church property. Plants included edible shrubs (currant, chokeberry, elderberry, etc) and haskap, lilies, black-eyed Susans among others. The wet conditions made planting ideal and the work was done in less than two hours! The wet summer kept the plants in good condition and no supplemental watering was needed during that time. We look forward to seeing how it looks next spring!
